

1. Body Text

This is a sample body paragraph that will be used to test the OCR capabilities of the DocTR model. It simulates printed document text.

2. Document Layout

Each section here should represent a distinct layout element including title, paragraphs, tables, and figures.

3. Code Block

```
def greet(name):  
    print(f"Hello, {name}!")  
  
greet('World')
```

4. Table

Name	Age	City
Alice	30	New York
Bob	25	Los Angeles
Charlie	35	Chicago

5. Link
